What is Data?

A close-up view of a spreadsheet with several columns of numerical data. The columns are color-coded: yellow, light blue, medium blue, teal, and green. The number 28758 is highlighted in a red box within the medium blue column.

Column 1 (Yellow)	Column 2 (Light Blue)	Column 3 (Medium Blue)	Column 4 (Teal)	Column 5 (Green)
29.3784	17.84832	28837	687792	691968
20.64456	29.3784	28746	692088	687792
17.79048	20.64456	28817	689904	692088
27.1464	17.79048	28758	691608	689904
36.2352	27.1464	28715	690192	691608
44.0064	36.2352	28824	690192	690192
61.2912	44.0064	28859	689160	690192
	61.2912	28789	691776	689160
			692616	691776
			690936	

What is Time Horizon Data?

Forecasted Results

+ Benefits of Liquidity Management

- 1. Boost Credit rating for debt refinancing
- 1. Data allows ability to forecast future cash & debt needs
- 1. Ability to identify all cash as a revenue generating asset
- 1. Monitor all bank fees
- 1. Provide “peace of mind” In addressing financial stresses during a natural, medical or human inflicted crisis

Modernized Approach to Revenue Forecasting

Deb Pianko, Senior Tax Industry Consultant, US Public Sector

Joe Zilka, Senior Manager, Government Solutions, US Public Sector

Bobby Gutierrez, Senior Analytic Consultant, US Public Sector

Andrew Ball, Director, Public Affairs & Policy, US Public Sector

SAS in Government

Analytics-driven Decisions
for Smarter Government

Government is our second-largest industry by revenue

SAS supports 700+ Government Departments, Ministries, Offices,
and Agencies in 134 countries around the world

100% of U.S. Government Cabinet Departments and Agencies,
as well as all 50 states are SAS customers

SAS in New York State

- 20 NYS Agencies and Authorities are currently leveraging SAS software including:
 - Supporting New York State Dept. Of Health Epidemiologists with COVID-19 Response;
 - Advanced budget and revenue forecasts at New York State Division of the Budget
 - Audit prioritization at New York State Department of Tax and Finance;
 - Leveraging predictive analytics to improve mental health outcomes at Office of Mental Health

Phases of Disruption

01 Respond

Achieving Situational Awareness

Responding and Adjusting

Mitigating Disruptions

02 Recover

Rebuilding Organization to Operate in the New Environment

03 Reimagine

Preparing the Organization for the Future

Building Resilience

The Challenge

The global **COVID-19** pandemic has a significant impact on governments' ability to **generate and forecast revenue**.

Integrate Newly Relevant Data

- Unprecedented problems need new insights
- Identification of novel data sets and healthcare response information

Understand Duration and Trends

- Quickly understand “cold spots”
- Industries, regions, and operations impacted

Accurately Forecast Revenue Streams

- Rapidly changing economic parameters
- Scenario analysis

Simulate Policy

- Quickly understand legislative and policy changes

How Analytics Can Help

Provide **reliable, timely data** and **revenue forecasting and planning**

Leverage New Data

Leverage multiple, previously unused data to understand trends and supports complex analysis

Scenario Analysis

Modify underlying factors to understand impact on revenues. Ex. If vehicle-miles-travelled increases next week due to easing restrictions, what is the impact?

Interactive Simulation

Allow modification of tax filing rules, thresholds, deductions, etc. at return level for a complete picture of impact

Visualize Trends

Understand how quickly revenue streams are diminishing. Sales/use tax/bankruptcies by industry or sector. Licensing applications/renewals

Advanced Forecasting

Quickly identify relevant indicators to better model tax forecasts. Ex. Understand how projected unemployment forecasts and consumer confidence impact sales tax, and personal/corporate income tax

Revenue Impact for Government

Trend Analysis and Scenario Demonstration

Example: Fuel Tax Revenue

Hypothesis: Revenue from Fuel Tax decrease due to less Vehicle Miles Traveled (or VMT)

Key Variables:

- Data Captured: Average Road Traffic by County
- Cost of Fuel: Average Fuel Cost in State
- Fuel Tax: Cost per Gallon by State
- Miles per Gallon: Average MPG for Vehicle

SAS can begin to estimate the potential loss in Fuel Tax revenue.

Example: Fuel Tax Revenue
